

LifeGuard Self-Assembled Safety Fitting System

Make Your Hose "Smarter" with 3 easy steps!

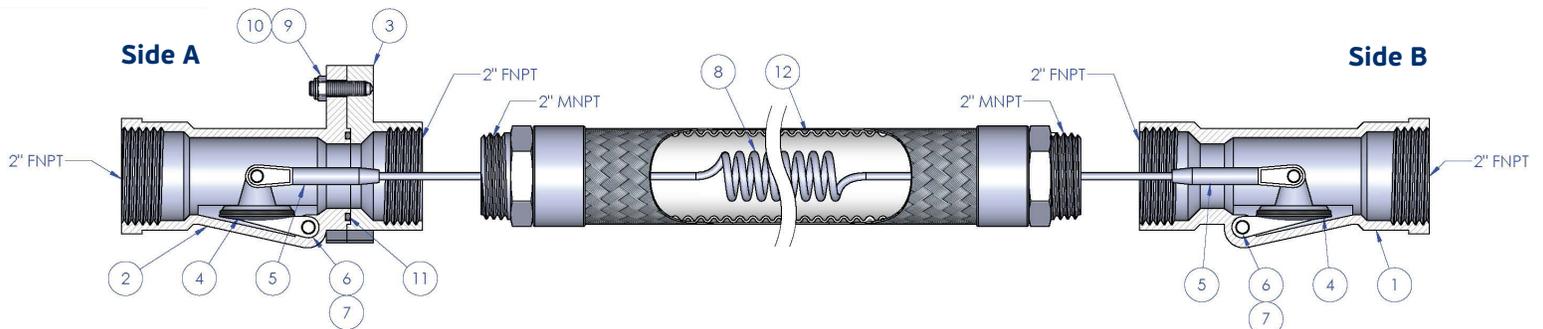

The LifeGuard Self-Assembled Safety Fitting System is a patent pending design that enables the user to thread each LifeGuard Safety Fitting onto an existing hose assembly and then attach the patented internal spring onto each fitting in your own facility.

Who Should Use This System?

1. Anyone who has an existing hose but wants to make it "Smart" and it isn't time to buy a new hose.
2. Anyone who is concerned about freight costs – the LG Fitting System ships in a small box costing a fraction of the freight cost of a complete assembly.
3. Anyone who wants to save money by making a one-time purchase and reusing the LifeGuard Self-Assembled Safety Fitting System over and over again!

How Do You Assemble the LifeGuard Self-Assembled Safety Fitting System?

1. Step 1 – Thread LifeGuard Fitting A onto **Side A** of hose and insert patented Safety Spring through bore of hose;
2. Step 2 – Thread one LifeGuard Fittings B onto **Side B** of hose;
3. Step 3 – Lock patented Safety Spring onto flapper Valve of LifeGuard Fittings B...

Pressure Test and Inspect your hose and you have a "Smarter" hose!
