

## LifeGuard™ Tri-Bolt Bulkhead Breakaway Units

- A unique need for LifeGuard™ Tri-Bolt Bulkhead Breakaway Unit is for Bulk Installations in which piping systems are not protected from being pulled apart by standard or Safety Hoses.
- The LifeGuard™ Tri-Bolt Bulkhead Breakaway Unit is designed to increase the safety of your hose and facility by incorporating protection against the unintended pull-away of tank trucks, railcars, barges and ships.
- Utilizing a **Engineered Compression Spring** system with two non-return valves installed within each fitting, we have now included a **Tri-Bolt Flange System** with three shear bolts on one fitting that separates under a controlled condition and prevents product loss in the event of an emergency separation.
- The LifeGuard™ Tri-Bolt Bulkhead Breakaway Unit is designed to separate at any angle when subjected to a

designated pull force. In case of separation, its patent pending design assures that not less than two bolts will separate causing the internal valves to engage and the piping to remain intact with flow stopped on both ends of the hose.
